- ENGLISH
- TAMIL

## PROJECTS

### AUTOMATIC WATER BILLING-IOT

Automated IoT-based water billing system: Monitors usage, calculates bills, and sends notifications. Optimizes resource management and enhances billing accuracy. Streamlines customer experience and promotes conservation.

### PRODUCT SHOP RECOMMENDATION SYSTEM

Our product recommendation system utilizes collaborative filtering and content-based filtering techniques to suggest items tailored to each user's preferences. By analyzing past purchases, browsing history, and demographic data, we provide personalized recommendations that enhance the shopping experiences

### INTELLIVOICE: HUMANIZED DIGITAL ASSISTANCE

IntelliVoice, when integrated into laptops, provides a humanized digital assistant experience, enhancing productivity and convenience. It leverages natural language processing to execute voice commands, manage tasks, and retrieve information efficiently. Users can interact hands-free, dictating emails, setting reminders, and searching the web. The assistant adapts to individual preferences, offering personalized suggestions and responses. Security features protect user data, maintaining privacy. This integration transforms laptops into smart, interactive devices, streamlining daily activities.
